SKILLS

Kotlin | Java | Android | AOSP | Computer Graphics | C++ | Web Development

EXPERIENCE

Framna | Software Engineer, Android Platform Lead Copenhagen | Sep 2023 - Present

- Leading the development of the OK apps as platform lead for Android.

Travel Europe, Africa, Asia | Jun 2022 - Aug 2023

Traveling with my partner through 30 countries across the world.

PayPal | Software Engineer (Contract) Stockholm | Nov 2020 - Jun 2022

- Worked on building the operating system for the Zettle Terminal hardware, based on Android Open Source Project.
- Developed new features for the Zettle Payments SDK, serving millions of users. This included developing new payment flows for app tipping, Venmo payments and accessibility first payments.

Bontouch | Software Engineer (Contract) Stockholm | Jun 2020 - Nov 2020

- Developed an Android app for Postnord customers to scan and print parcel labels at service points. This work involved hardware device integrations through usb and bluetooth.

  This work involved developing functionality revolving around multiple connected hardware devices through usb and bluetooth, and development of hardware device integration for Android. The project was delivered ahead of estimations, and provided improvements for the clients workflows.

Bontouch | Software Engineer, Android Platform Lead Stockholm, London | Aug 2016 - Jan 2020

- Led the development of Coop as platform lead for Android, building one of the largest ecommerce grocery apps in the Nordics from the ground up, serving hundreds of thousands of users.
- As platform lead I ensured high technical quality through technical leadership, architecture, software engineering best practices, code reviews, among others.
- Relocated to the London office to lead the app experience for the Android platform of the GoAhead bus apps during the final months before release.
- Developed a suite of apps for Swedish Railways, used daily by staff to manage and maintain trains across Sweden.
- Technical mentor for master thesis interns in partnership with KTH.

Susumi | Co-founder, Software Engineer Stockholm | 2016 - 2019

- Co-founded a company developing interactive mixed reality experiences using Unity, which were featured in the Swedish National Museum of Science and Technology, among others.

We Know IT | Software Engineer

Stockholm | Oct 2014 - Jun 2015

- Worked as a consultant developing and designing websites using WordPress, PHP and HTLM/CSS in close partnership with clients to meet their business needs.

5 Monkeys Agency | Software Engineer

Stockholm | Jan 2015 - Mar 2015

- Worked as a developer on Clique, a clothing ecommerce store for both web and mobile platforms using AngularJS and HTLM/CSS.

Freelance Software Engineer

Stockholm | May 2012 - Aug 2012

- Worked as a freelance consultant for a real time audio analysis project in partnership with KTH Innovation. I developed both frontend UI features and backend audio features using C++, Java and JNI.

EDUCATION

KTH Royal Institute of Technology | Master of Science, Computer Science

Stockholm | 2011 - 2016

4.6 / 5.0 grade average | Specialization in Computer Graphics | Exchange studies at KAIST, South Korea

PROJECTS

rgbc | GameBoy Color emulator written in Rust, based on the Sharp SM83 CPU.
